New System Pro M Compact

ATLV Products

ABB is pleased to announce the new UL489 Listed "miniature" molded case circuit breakers. The S200U and S200UP breakers are designed for use as branch circuit protective devices for circuits feeding either resistive or inductive loads.

They combine the functionality of an MCCB and the features of a miniature circuit breaker including: compact size, DIN rail mounting, current limiting, and multiple accessories: busbar, aux. contacts, shunt trips, etc.

They protect loads like: lighting, motors, transformers, cables, duplex plugs, and other loads with high inrush currents.

- UL489 branch circuit protection
- Protects motors, transformers, lighting
- 1, 2, 3, or 4 pole models available
- S200U Series - from 0.2 to 63 amps
- S200U - up to 240 VAC, 10 kAIC
- S200UP Series - up to 25 amps
- S200UP - to 480Y/277 VAC, 10 kAIC
- Standard European and North American current sizes.

- Analog Converters
- ARC Guard Systems
- Cable Management
- Contactors
- Circuit Breakers "MCCB"
- Liquid Level Controls
- Limit Switches
- LVNQ Capacitors
- Manual Motor Protectors
- Motor Starters
- Overload Relays
- Pilot Devices
- Power Breakers
- Power Supplies
- PLC's
- Safety Relays
- Sensors
- SoftStarters
- Surge Protection Systems
- Terminal Blocks
- Timers
- Tower Lighting Controls
- 3 Phase Motor Protectors
